## Annual show – 30 August 2025

### VEGETABLES – GUIDING NOTES

The following hints are designed to help you if you have not entered a show before and are not quite sure how to go about it.

#### FIRST STEPS

Read the schedule carefully.

Make sure you have the correct quantities of vegetables for the classes you wish to enter.

Choosing your exhibits - judges look for three things -

- Condition - all vegetables should be clean, fresh and free from blemishes
- Uniformity - all vegetables should be of a similar size, shape and colour
- Size - important, but only if the other qualities are present as well

#### PREPARING YOUR EXHIBITS :-

##### BEETROOT

Select beetroots of even and medium size. Avoid those with poor skin colour at the base of the root. Check, on spares, that the flesh is a good colour and free from paler rings. Leave roots on. Wash carefully to remove soil without damaging skin.

##### CABBAGE

Must weigh at least 450 gm. Avoid choosing one with a split heart or with leaves damaged by pests such as caterpillars. Leave outer leaves on. Trim stalk close to base of cabbage. The aim is to get a fresh cabbage with a solid, close-packed heart showing little coarseness or stalk.

##### CARROTS

Select uniform roots of good colour. Avoid those with pale coloured skin or which have turned green near the top of the roots.

##### LEEKs

Wash carefully and trim roots to 8 cm in length. Avoid stripping too many layers of the outer skin away. Keep the leaves intact. Look for a good length of straight blanched stem without any bulbous base.

##### ONIONS

Select for uniform shape and size. Class 4 - retain blades and roots. Class 19 - remove roots and top, strip off outer leaves to smooth skin. Lift three weeks before show date approximately to allow drying off and ripening. To dress – cut tops off and bind. Do not fold tops over.

##### PEAS

Look for large, fresh pods of a good colour. Retain the natural 'bloom' by handling the stems to keep them looking fresh. Exhibit on a plate or doily in a circular formation, lower ends facing outwards.

##### POTATOES

Select medium sized tubers with only a few shallow eyes. Match them for shape and size. Clean carefully with a soft sponge and plenty of water, never scrub them clean. Arrange on a small plate.

##### RUNNER BEANS

Avoid pale coloured coarse beans, and look for long slender straight fresh beans. Keep a short length of stem on each. Arrange directly on bench as neatly and straight as possible.

##### SHALLOTS

Match separate bulbs, not clusters, for size and shape. Remove loose skins and tie down the neck with raffia or thin twine. Arrange in circular fashion bedded in sand on a small plate.

##### TOMATOES

Avoid poorly coloured or over-ripe fruit. Aim for uniformity and firmness with fresh green stalk intact on each tomato. Arrange on a small plate.

##### TURNIPS and SWEDES

Choose roots about the size of a cricket ball, with an even shape and small tap root. Wash carefully to remove soil, strip leaves back to 8 cm.

##### TRAY of VEGETABLES

Tray 60 cm x 45 cm. Line with fabric (optional).
